Paper Title

BanglaPlate: Automated Vehicle Number Plate Detection and Recognition using YOLOv8

Reviewer #1

Questions

6. Comments to the authors (your suggestions are extremely important for the authors to improve the quality of the paper.)

I could not find new contributions or new idea

figures are not clear

reference writing style not good

need recent works discussion

Need to compare results with some recent papers from 2024-25 which is missing

How can we understand why your method is better?

Kindly provide comparable results..give complexity analysis results

add new papers from 2023-24 in your references

check whether plagiarism level is below 20 percent

need to provide clear figures

7. Overall Recommendation

Weak Accept (4)

Questions

6. Comments to the authors (your suggestions are extremely important for the authors to improve the quality of the paper.)

- The only notable contribution is the creation of a new dataset; the models themselves are not novel.

- Lack of clarity on how bias or overfitting issues were addressed, especially given the small dataset size.

- References do not adhere to the IEEE style properly.
